Brief Profile of the College

University College of Science, OU, Saifabad, a Constituent College of Osmania University, is situated at Masabtank in Hyderabad. It was established in 1951 in the prime locality at the foot hills of Banjara Hills. Originally the college offered only intermediate courses and was situated at Gulbarga of erstwhile Nizam state. Subsequently it was shifted to the present location. Late Nawab Ali Yavar Jung Bahadur, the then Vice-Chancellor of Osmania University, used his benevolent offices to acquire the present college campus at Saifabad (in the western part of Hyderabad).

The serene and sprawling campus which spreads over a vast stretch of land measuring about 18.173 acres with lush gardens is in complete contrast to the chaos of traffic prevailing outside the college. A fossil conifer wood of araucarioxylon species of early Jurassic age (175 million years old) which was gifted to the College by the Geological Survey of India (Southern Region, Hyderabad), warmly welcomes any enthusiastic visitor to the college.

For the past 7 decades, the College has shown steady progress, as enumerated below for the cause of higher education as per the contemporary needs of the students. In the brief history of 79 years of Under Graduate & Post-Graduation institution, the college is proud of its academic achievements. The generous funding for research by UGC, DST, CSIR, ICAR, ONGC, and DAE reflects active and fruitful research activity.
