

Smaller States & Social Justice

Foreword

Prof. Keshav Rao Jhadav

The concept of decentralization of India came from Gandhiji. He wanted to the benefits of development to reach what he called that a smaller man, now as again this economic policy was based on western industrial model, now the only reason why western economic model succeeded is because, the western European and American head concept of entire world resulted in human exploitation of large parts of Asia, Africa, North & South America. What is called the American dream is in fact based on the total destruction of the native people of America who were also described as Red-Indians. The entire (Red-Indians) population of North America had been massacred and the lands were taken over by (white) Europeans. Secondly millions of black people were slaved, black people of Africa where is slaved and brought to America to work on cotton and tobacco farms of North America. These firm created on the lands were taken over from Red-Indians. The labour was free as black people from Africa were forcibly brought to America to work on cotton and tobacco farms. The conditions under which they work were so horrible that no black man survived in environment of the forced labour. The black people of America today or the descendents of those unfortunate people. These black people of today have no knowledge of the exactly who their ancestors were. This is the one of the darkest chapter of the human history. The number of novels, poems, and plays have in written on this tragedy that North America, Martin Luther King's agitation brought out all this terrible facts to the notice of entire world. John Abraham Lincoln had abolished slavery as he could not do anything to improve the livelihood of billions of black workers of cotton and sugarcane farms. Today when the Americans creates the class system and forget that the American caste system, also called racism at a short duration compared to the Indian caste system. One more horrible and violent aspect is that why there is so much of pain in American black peoples music, poetry and fiction. The Indian caste system has lasted for about 2000 years and is still continuing. Though humanity has been reduced a narrow little thoughts. So Dr. B.R.Ambedkar's Chairman of Constitution

of India, made quite a lot of efforts to bring down this segregation in most villages in India. Even now there is segregation of Schedule Caste people (Shudras) from STs in the National mainstream planning. There are trials for their justification seen even till today. Even parties like DMK & AIADMK seem to do everything possible to bring down the suffering of Dalits. A great reformative movement like Aryasamaj by Rajaramohan Roy tried his level best to bring down the disparities in society suffering but there is still much to do, Buddha and Mahaveera trying to reform the system, but in famous incident, Buddha said that is Sangams will not allowed Dalits & Women to Join the Viharas, the reason that he has given was what would happen to agriculture if Shudras were allowed to join in Viharas. He also felt that if women were allowed into the Viharas they may corrupt the entire system and Viharas will disappear. We see the greatest son of India was not concerned about the sufferings of Shudras and women. Today Dalits have joined the Buddhist religious system but the segregation in rural India continues. All most in the same manner Muslims and Christian society have refused, in practice to give equally status to Schedule Caste's and women, only two thinkers rejected this attitude were Dr. Ambedkar a Dalit and Dr. Lohia a revolutionary socialist who fears attack on the caste system is comparable. Dr. Ambedkar movement (Mala). Mahatma Jyothirao Pule were mainly concerned with backward castes also described as Shudras. The Arya Samaj continued it revolutionary activities for about 70 years and has now more less disappears.

It is for Hindu to take up this internal challenge to a dignified life for all Indians.
