Dr. B. Kiran Kumar, Assistant Professor; Department of Botany, O.U., has obtained his M.Sc., and Ph.D., from Osmania University and his area of specialization of **Molecular Genetics and Plant Biotechnology**. He worked as **DBT-Post Doctoral Fellow** at **National Institute for Plant Biotechnology (NIPB), Indian Agricultural Research Institute (IARI) New Delhi** on **Genetic Engineering and Gene Pyramiding in Bt-brinjal**.

He worked as a scientist (Biotechnology) in well-known private seed companies working on cloning strategies of biotic and abiotic genes, Bt-protein quantification and zygosity. He had completed a UGC-BSR start-up research project on linseed and other projects sponsored by UGC, UPE-FAR-OU. **Seven students awarded Ph.D's** under his supervision and presently 3 research scholars are working for their Ph.D in different fields of biotechnology and plant sciences. He has **written 4 book chapters** published in well-known publisher (**Wiley-VCH Publication, Weinheim, Taylor and Francis**) & **a Text book of Botany published by Telugu academy** besides publishing more than **40** papers in esteemed National and International Journals like Springer, Elsevier, MDPI etc. with high impact factor. Attended several national and international conferences, presented papers & posters in symposia, workshops and delivered lectures. He is a life member of different societies of science academies.
