

Dr. B. Sandeeptha
Asst. Professor

Dr. B. Sandeeptha joined the department in 2007. She is teaching biochemistry, virology and other subjects. She is working on gene regulation, signal transduction events in hypoxia in neuronal proteome. Her areas of interest are Molecular Pathogenesis and screening for biomarkers in hypoxia. She won the best poster award at AICCG-International Symposium on Deciphering Molecular Basis of Pathogenesis, December 2007. She received Raman Fellowship from UGC during 2016-17 for her PDF program
