

Dr. A. Srinivas

M.Sc, Ph.D

Assistant Professor

Dr. A. Srinivas obtained his Master's degree in Genetics from Osmania University, Hyderabad and did his Doctorate in Life Sciences from University of Hyderabad (Central University), Hyderabad. He had carried out several regulatory and non-regulatory pharmaceutical bioavailability and bioequivalence of drugs in Phase I and Phase II clinical trial projects of pharmaceutical industry. He was involved in biological sample analysis for drugs/metabolites concentration and development, validation and implementation of bio-analytical methods. He had worked in academics and taught in areas of phytochemical and herbal medicine, biosensors and bioelectronics, nanobiotechnology, biopharmaceutical technology, plant biotechnology, immunotechnology for both undergraduate and post-graduate levels. At the Department of Genetics, Osmania University and Department of Biotechnology PG Saifabad teaching PG and UG dealing with subjects Plant Genetics and Molecular Breeding, Plant Genomic and Biotechnology, Applied Microbial Genetics, Animal Biotechnology, Bioprocess Engineering. His broad research interests include functional genomics and biotechnology. He has published research work in International and National Journals and awarded a Ph.D. He delivered talks and participated at national and international conferences, refresher courses and training programmes
